Professional Profile

Associate of Science in Computer Science (ASCS) graduate (March 2026) and AI/ML Engineer with a strong full-stack and systems background.

Founder & CTO of Prae Technologies and architect of PraeHire, a live AI-powered talent platform used for real-time talent matching.

Over 6 years of experience in the global digital economy (Fiverr, Jiji), blending engineering rigor, AI, and user-focused product design across web, mobile, and hardware-integrated systems.

Key Skills

- **Programming:** Python, JavaScript, TypeScript, Golang, Java, C/C++, HTML, CSS, Dart.
- **AI & Data:** Machine Learning workflows, Computer Vision, NLP, real-time analytics dashboards, model integration into production apps.
- **Web & Mobile:** React, Next.js, SPA development, REST APIs, Flutter, Firebase/Firestore, MongoDB.

- **Systems & Robotics:** Hardware reverse engineering, robotics, sensor/actuator integration and debugging, embedded-style logic.
 - **DevOps & Tooling:** Git, GitHub Actions (CI/CD), GitHub Pages, cloud deployment, automated build and release workflows.
 - **Product & Communication:** Technical documentation, requirements gathering, stakeholder communication, client collaboration in fully remote settings.
-

Professional Experience

Campus Ambassador – Cowrywise
Lagos, Nigeria | Dec 2025 – Present

- Represent Cowrywise on campus, driving adoption of digital savings and investment products among students.
- Host info sessions, content, and community events that increase product awareness and financial literacy.

Student Ambassador – University of the People
Remote | Apr 2025 – Present

- Promote UoPeople's mission globally, mentoring prospective and current students and supporting onboarding.
- Lead and participate in events, sessions, and online communities that strengthen student engagement and retention.

Founder & CTO – Prae Technologies
Lagos, Nigeria | 2024 – Present

- Architected and deployed PraeHire (<https://praehire.web.app>), a live AI recruitment platform that matches talent to roles in real time.
- Own the end-to-end technical vision, product roadmap, and system reliability for talent-matching solutions.
- Designed modular backend and frontend architecture using React, TypeScript, Firebase, AI APIs, and cloud services.

Full-Stack Developer & AI Specialist – Fiverr (Freelance)
Remote | 2020 – Present

- Delivered automation tools, analytics dashboards, and full-stack web applications for global clients with repeat engagements.
- Maintain multiple public repositories demonstrating production-ready code, experimentation, and hardware/software integrations.
- Translate complex technical requirements into scalable solutions with clear documentation and ongoing support.

Technical Sales & Product Specialist – Jiji.ng

Lagos, Nigeria | 2020 – Present

- Manage technical product listings in electronics and engineering, optimizing descriptions, pricing, and media for conversion.
- Use data insights to refine storefront performance, improve buyer experience, and support sales targets.

Internet Manager – Hope Hope Golden

Ibadan, Oyo State, Nigeria | Jan 2022 – Apr 2022

- Managed digital presence and online promotion for the business, focusing on reach, engagement, and responsiveness.
- Coordinated content updates and handled basic support across social and online channels.

Graphic Designer – Awemark

Ibadan, Oyo State, Nigeria | Feb 2017 – Jan 2020

- Delivered branding, marketing, and production-ready graphics for campaigns and corporate clients.
- Collaborated with cross-functional teams to produce cohesive visuals across print and digital media.

Education

SCAN TO VERIFY

Associate of Science in Computer Science (ASCS)
University of the People | Graduated March 2026

- 66 credits completed.
- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Database Systems.

Bachelor of Science in Computer Science (BSc), Candidate
University of the People | In Progress (Expected 2027)

- Continuing advanced CS coursework, AI, software engineering projects, and capstone preparation.

Selected Projects & Repositories

PraeHire – AI Recruitment Platform

Live App: <https://praehire.web.app>

GitHub: (PraeHire repo on your GitHub profile)

- AI-driven hiring platform that scores and matches candidates to roles using structured inputs and AI workflows.
- Stack: React, TypeScript, Firebase, AI APIs, MongoDB; supports real-time updates and secure authentication.

Real-time Analytics Dashboard

GitHub: <https://github.com/Jerronce/realtime-analytics-dashboard>

- Browser-based dashboard for real-time metrics and data storytelling.
- Focus on performance, live data streams, and clear visualization patterns for decision-making.

Virtual Reality Controller

GitHub: https://github.com/Jerronce/Virtual_Reality_Controller

- **Hardware-software integration mapping sensor inputs to VR actions, enabling custom control schemes.**
- **Demonstrates low-level device handling, calibration, and interaction design.**

Mexty Web App

GitHub: <https://github.com/Jerronce/mexty> (or your exact repo link)

- **Modular React-based architecture with advanced state management and reusable UI patterns.**
- **Implements best practices for component composition, routing, and data flow.**

Farad-App & RadarApp

Farad: <https://github.com/Jerronce/Farad-App>

Radar: <https://github.com/Jerronce/RadarApp>

- **Engineering and visualization tools for motion, signal, or electrical workflows.**
- **Showcase simulation logic, visualization, and domain-specific calculations.**

Additional Repositories

GitHub Profile: <https://github.com/Jerronce>

- **50+ repositories including experiments in AI, web apps, robotics, and automation workflows, with CI/CD and GitHub Pages deployments.**

Certifications

- **Certified AI/ML Engineer – WorldQuant University.**
- **Other AI, software, or cloud certificates as listed on your LinkedIn (add here by exact name and issuer).**

Activities & Leadership

- **Student Ambassador – University of the People (AY2026), mentoring students and promoting the program globally.**
- **Campus Ambassador – Cowrywise, leading financial literacy and savings adoption initiatives.**

- **Community contributions via GitHub, LinkedIn posts, and open-source experimentation on jerronce.github.io.**
